BABY BULBS

Baby bulbs are the small bulbs first year's growth from the bulblets and make the number 6 and 7 bulbs and are $\frac{1}{4}$ to $\frac{1}{2}$ inch in size. These should all grow and some varieties produce flowers and all make large bulbs which should give nice blooms next year.

We have been offering the baby bulbs in a mixture for the past two years and have had good reports from customers who have had them. This year we are offering them in named varieties at only a small advance in price over the bulblets. We believe in the long run these will be cheaper than the bulblets and besides you gain a whole year in getting large flowering bulbs.

GLADIOLUS BULBLETS

HOW TO HANDLE YOUR CHOICE BULBLETS

Early, medium and late, red, white, pink, maroon, smoky, yellow, spotted and all shades of color. Tall, short, large and small, ruffled etc. From varieties the bulbs sell from 5c up. Some have sold for \$1.00 or more.
